

**Form for nominations to the Executive Committee 2024/2025 - RE-STANDING FORM**

Committee role:  
Research Officer and vice-chair

Statement to support re-standing:

As Research officer for the MACP, I have been committed to supporting members in their research aspirations. Together with the research committee and co-opted members, we have updated the research awards, ensuring they are contemporary and meet the needs of the membership, whilst ensuring that the research focus is supporting studies which have impact on MSK health. The research awards will be released in 2025 and we hope to see more applications from members moving forward.

Together with the APPN, I ran a conference this year to help to support and develop novice researchers which was very well received by all attendees. We plan to run another conference in 2025/26 to provide a nurturing and supportive environment to those who are less experienced in research and would like to develop these skills further.

During my tenure we have also supported members with dissemination of their research and helped members to recruit to their studies. We have also participated with research studies where the MACP's voice is key.

I would like to continue in this role to review the role out of the awards and develop the nurturing research conference further. The research committee and I will also review the role of the committee to consider future directions so that we not only support MACP members with research but ensure that the MACP is well placed strategically and links with wider significant MSK research organisations.

Name of proposer  
Laura Finucane

Name of seconder  
Clair Hebron
